

**Information Technology Division
Programming and Information Sciences Department
Computer Programming and Development Degree
FA2026**

CTI.110.2801 IT Foundations

Course Information

Course Instructor: Mr. Gardner, Instructor of Computer Programming

Email: etgardner@waketech.edu (preferred method). **Teams: Message me!**

Course Description: This course covers the introduction of the tools and resources available to students in programming, mark-up language and services on the Internet. Topics include standard mark-up language Internet services, creating web pages, using search engines, file transfer programs and database design and creation with DBMS products. Upon completion students, should be able to demonstrate knowledge of programming tools, deploy a website with mark-up tools, and create a simple database table.

Credit Hours: Three (3) semester hours

Prerequisite: None

Program Learning Outcomes

Upon completion of this program, students will be able to:

Outcome 1: Computer Programming students will demonstrate competent programming skills in a mark-up language

Outcome 2: Computer Programming students will write HTML, manage data, consider user interfaces/experiences, and utilize cloud technologies, to create a program.

Outcome 3: Computer Programming students will deploy a website and demonstrate familiarity with tools used for revision control and team projects

Outcome 4: Computer Programming students will have the ability to produce college-level content that conveys purpose and meaning at the mastery level.

Outcome 5: Computer Programming students will have the ability to reason and solve problems, draw conclusions, or generate new ideas or artifacts using appropriate knowledge and skills.

Outcome 6: Computer Programming students will demonstrate a knowledge of computer logic using Boolean operators

Student Learning Outcomes

Upon completion of this course, students will be able to:

SLO#	Description	PLO Supported
SLO1	Comprehend programming fundamentals using Boolean logic	PLO1,2,6
SLO2	Use web-based services, search engines, and source control systems	PLO1,2
SLO3	Create a simple web and form web page using HTML and CSS.	PLO1,3,4
SLO4	Create a simple database table and use SQL Statements to query databases	PLO1,2,4
SLO5	Create Algorithms Using Programming Structures	PLO1,2,5

Course Requirements and/or Expectations

1. All Sections
 - a. Students are responsible for all the information presented in the Wake Technical Community College Student Handbook.
 - b. The college forbids the use of all audible electronic equipment during instructional time.
 - i. Forbidden devices include but are not limited to: cell phones, smart phones, MP3 players, tablets. Phones will be permitted when the instructor gives explicit permission.
 - a. Assignments/Labs/Quizzes/Exams are turned in on time. **No late assignments/labs/quizzes/exams are accepted without medical evidence.**
 - b. Required Reading has been completed before starting the Lesson Lab
2. Seated/Hybrid
 - a. Please note that class computers are to be used at all times for official course purposes.
 - b. Use of class computers for general web surfing, e-mailing, chat room discussions, social networking, and any other non-course related task is forbidden if made to be a disruption in class and/or when student work is unfinished. Violation of this rule may result in a grade deduction.
 - c. If a student misses a lecture or arrives late, he/she/they are responsible for the material presented, handouts distributed, and any announcements made that day. The instructor will not provide notes for missed classes.
 - d. Required reading has been reviewed before lecture class and completed before start of lab class meetings.

Required Textbooks

See BibliU Course Materials link to access your digital textbook.

Special Software or Hardware Requirements

Software
Visual Studio Code (https://code.visualstudio.com/)

Grading or Evaluation

Category	Weight
Assignments	50%
Quizzes	10%
Mid-Term Project	10%
Mid-Term Exam	10%
Final Project	10%
Final Exam	10%

Disability Support Services

Wake Technical Community College does not discriminate on the basis of disability in the admissions or employment processes or in access to programs, facilities, or activities. Disability Support Services (DSS) is available for students who require academic accommodations due to any physical, psychological, or learning disability. Please visit the website for Disability Support Services (opens in new window), URL: <http://disabilityservices.waketech.edu>, for additional information. To connect with a DSS coordinator and determine eligibility, contact the Main campus at Phone: 919-866-5670 (Sorenson video phone for the deaf: 919-324-1508). Fax: 919-662-3616. Or, contact North campus office at Phone: 919-532-5713. Fax: 919-878-1896.

Wake Tech Core Values

Wake Technical Community College will structure its operations, training, and educational programs around the Core Values of accountability, respect, responsibility, critical thinking, communication, and collaboration.

- **Accountability**—Accountability is essential for an environment of learning. Those who are accountable stand by their words and actions, taking full responsibility for what they create and for what they contribute to the community.
- **Respect**—Respect is a prerequisite for enhancing learning. Community members who respect themselves and others help create a safe, yet open, climate of learning.
- **Responsibility**—Responsibility is the root of success. Students who assume personal responsibility for their education will reach their goals. Responsible students also make contributions to their communities.
- **Critical Thinking**—Critical thinking is the fundamental purpose of higher education. The ability to solve problems through the application of the appropriate skills is critical to all disciplines.

- **Communication**—Communication is increasingly the key competency for living and working in the information age. Communicating effectively in oral and written forms through traditional and new media is a powerful tool for personal and career success.
- **Collaboration**—Collaboration, by bringing together individual knowledge and talents, creates teams that are greater than the sum of their parts. Such teamwork maximizes benefits to individuals and the community.

CRITICAL SUCCESS STRATEGIES

- **Assignments**—The Programming and Information Sciences Department does not accept late assignments without medical evidence.
- **Course Workload**—Outside of scheduled class time students should expect to routinely review course materials and study if struggling. For students with little or no prior computer experience, you may find it necessary to commit additional hours to practicing the concepts presented.
- **Technical Skill Level Required**—This course is an introductory programming, web and database course and IS NOT a basic computer skills course. With this in mind, it is expected that students enrolled in this course are able to: turn on the computer, use a keyboard and mouse to perform basic computer operations, open and save files, access their student e-mail, Blackboard and WebAdvisor accounts, and communicate any individual needs or limitations to the instructor as necessary. A basic computer skills jump start course is offered through our Jaguar Office of Learning Technology (JOLT). If you need to learn basic computer skills, please contact your instructor right away. Again, this class is not a basic computer skills course.
- **Prior Knowledge Needed**—A basic comfort level of using a computer to browse the Internet, save files, and send email is expected of students enrolled in this course. Students are also expected to correctly build program folder structure.
- **Open Communication Statement**—As your instructor, I am committed to your success as a student. To this end, I am available via email any time and MS Teams upon request. E-mails are responded to as necessitated (and when necessary – as some e-mails are simply informative and require no reply). Weekends and holidays may take as long as 48 hours.
- **Coding Assignments**—All coding assignments for both exams and homework are expected to be your original work. Collaboration is permitted, but no two programs should ever be exactly the same. It will be considered a violation if you copy work from another student or from the Internet and/or Generative AI. If this occurs, you will be charged with Academic Dishonesty.

Policies

Students are responsible for reading the information and policies set forth in the [Wake Technical Community College catalog \(opens in new window\)](http://catalog.waketech.edu), URL: [http://catalog.waketech.edu], as well as additional requirements set by the instructor. Students are held accountable for this information. New policies and policy changes will be communicated to students on the official [Updates page \(opens in new window\)](http://updates.waketech.edu), URL: [http://updates.waketech.edu].

Communication

Appropriate Communication—Students are expected to communicate in clear, correct, respectful Standard American English at all times. This includes all online or electronic

communication, which should follow the standards of Internet etiquette (also known as “netiquette”). Students unfamiliar with these concepts and conventions should check with their instructors.

Attendance Policy

Absences—The college catalog student handbook states that “students are expected to be in attendance at least 90 percent of all scheduled class meetings. An absence is defined as missing one-third or more of any regularly scheduled class meeting.” If you anticipate an absence, notify your instructor in advance. “If prior notification is not possible, the student should contact the instructor immediately upon returning to the College to determine the next course of action.”

Absences due to religious holidays—The college catalog states that “Wake Tech students are allowed two class days of excused absences per academic year for religious observances. It is the student’s responsibility to contact the instructor for each course in which work will be missed. The student must provide written notification to the instructor within the first two weeks of the semester, identifying the religious observance and date of the planned absence.”

Days missed for religious observances will be counted as absences, but they will not be considered part of the allowed 10%. Reasonable accommodations will be made for affected students in regard to any resulting missed work.

Artificial Intelligence Policy

This will be discussed often in class. Artificial Intelligence is a growing concern both as a tool to be utilized and a potential source of cheating and confusion. AI has issues with both factuality and faithfulness, as we’ll discuss in class. Currently the top models are only around 70% accurate. Because of this, AI may only be used in this class for trivial content generation:

- A) **You may** use AI to generate webpage assets and graphics. You must cite the AI model used and provide the original prompt as a footnote to the content.
- B) **You may not** use AI to generate code, code snippets, or answers to questions.

Using AI to generate code or answers to questions is an Academic Integrity violation. Using AI as an assistance without citation is also an Academic Integrity Violation.

Late Work Policy

All course work is due at the time and date specified in Blackboard. There are no exemptions or exceptions. **No late work will be accepted for grade without evidence of emergency as outlined in Wake Tech Community College policies.** Missing all deadlines for a lesson is an absence.

Official Communication with Students Policy

Every curriculum student is provided with an official Wake Tech email account through the [Wake Tech student portal \(opens in new window\)](http://my.waketech.edu), URL: [http://my.waketech.edu].

- Students must first activate their my.waketech.edu account, wait 24 hours, and then activate the email account.
- This college-issued email account is to be used for all email correspondence with instructors and other college officials.

Official correspondence from the college (communications from instructors, information about registration or financial aid, etc.) will be sent to students’ Wake Tech email address **ONLY**. Instructors and college officials may refuse to accept student emails sent from other addresses. Review the Registration and Records section in [Wake Tech’s catalog \(opens in new window\)](#),

URL: [<http://catalog.waketech.edu>], for updates to the Official Communication with Students Policy.

FERPA Statement

Review the Academic Policies section of [Wake Tech's catalog \(opens in new window\)](#), URL: [<http://catalog.waketech.edu>], for updates.

Following the *Family Educational Rights and Privacy Act (FERPA) of 1974*, instructors are prohibited from discussing a student's grade or other matters related to academic performance outside of the Blackboard grade center. Faculty may send grades to individual students via email only when written authorization from the student is on file (WTCC Form 1126).

The Authorization to Release Instructor Graded Material (WTCC Form 1126) does not apply to final grades. Final grades will be accessed through WebAdvisor only or with a Request for Transcript.

Students may request this form from the instructor.

Wake Technical Community College Academic Integrity Policy

"Wake Technical Community College expects students to demonstrate the highest personal integrity in all academic work and behavior.... Students may be asked to sign a statement of academic integrity upon entering Wake Tech classes." Review the Student Code of Conduct, Rights, and Responsibilities section of [Wake Tech's catalog \(opens in new window\)](#), URL: [<http://catalog.waketech.edu>], for additional information.

Student Code of Conduct

"Students are expected to conduct themselves in accordance with generally-accepted standards of scholarship and conduct. The purpose of the Student Code of Conduct (the Student Code) is not to restrict student freedom but to protect the rights of all students in their academic pursuits." Review the Student Code of Conduct, Rights, and Responsibilities section of [Wake Tech's catalog \(opens in new window\)](#), URL: [<http://catalog.waketech.edu>], for additional information.

Student Concerns

Most classroom issues can be solved with respectful and prompt communication. For a student concern, **please follow the steps outlined by the University Studies & Educational Technologies department. Students not following the steps will be redirected.**

- **The first step** for resolving the situation is generally for the student to communicate concerns or complaints *with the instructor, outside of class time*.
- Be sure to complete the Student Complaint form at:
https://cm.maxient.com/reportingform.php?WakeTechCC&layout_id=3
- As a follow-up step, the student can contact the Department Head for that course. (see below for contact information).
- If the matter remains unresolved, the student may contact the Associate Dean of Information Technology, be prepared to explain the particular area of disagreement with the decision of the instructor and Department Head.

Student Care Center

When personal stressors and out-of-the-classroom challenges interfere with your academic performance and daily life, ***the CARE Center (new window)*** [[URL : https://www.waketech.edu/carecenter](https://www.waketech.edu/carecenter)] is here to provide wraparound supports such as Wellness Services (free, brief mental health counseling), student success coaching, food resources, emergency financial aid including funding for textbooks and course materials, technology assistance, and transportation assistance. To learn more, contact us at care@waketech.edu or 919.866.6111.

Student Complaint Process

Any questions, complaints or matters related to this course should be addressed with the instructor for your course. If the matter cannot be resolved with the instructor, please contact the department head supervising the course. The department head for this course is Emmie Mercer. A complaint may also be filed using Wake Tech's online [Complaint Form \(opens in new window\)](https://cm.maxient.com/reportingform.php?WakeTechCC&layout_id=3), URL: [https://cm.maxient.com/reportingform.php?WakeTechCC&layout_id=3]

Administrator	Title	Office	Email	Phone

Plagiarism and Professionalism

This department has a zero-tolerance policy on plagiarism. All coursework should be your own. Any work which has been plagiarized or is discovered to be plagiarized will be hurtful to your reputation, the school, the program, and the faculty and students within it.

Please do not use any of the following in your coursework:

- Create a copy of someone else's work either in part or whole.
- Copy code from online sources and submit it as your own.
- Use prebuilt templates without your instructor's permission
- Use stock images that are not licensed as free for commercial use with no attribution. All images used should be cited in the assignment submission box.
- Use someone else's work or ideas. Inspiration turns into imitation when copying what is considered the crux—or central idea—of the work.

Please review the Wake Tech Student Handbook materials on Academic Integrity—Cheating and Plagiarism (opens in new window). [Plain text

URL: <https://www.waketech.edu/catalog/student-code-conduct-rights-and-responsibilities>]

Anyone submitting plagiarized work or violating the college's academic integrity policy will be reported to a Student Conduct Officer and will (at minimum) receive a zero for the assignment. This is your warning.

- 1st offense: 0 on assignment with an FYI letter from the Student Conduct Office with the recommendation to complete the Plagiarism in a Digital World session offered by the ILC
- 2nd offense: WD from course with the grade of F
- 2nd offense in the same semester 2 different classes: WD from 2nd course with the grade of F
- 2nd offense in 2 different semesters same classes: WD from course with the grade of F
- 2nd offense in 2 different semesters 2 different classes: WD from 2nd course with the grade of F

When taking exams or quizzes, students will not give or receive aid. This includes discussing the exam or providing copies of the quiz with or to students who have not yet taken it. Course material, including exams/quizzes, must not be posted online without the college's approval. If you are aware of cheating on any assessment, students have an obligation to inform the instructor.
